EDUCATION

M.S. Computer Science — University of New Haven

Expected 2026

B.E. Computer Science & Engineering — Hindusthan College of Engineering and Technology

PROFESSIONAL EXPERIENCE

Software Engineer — Friends Fabs

Aug 2023 – Aug 2024

- Built and maintained 5+ responsive web applications using JavaScript, Vue.js, Node.js, HTML, and CSS, improving UI consistency across the product
- Built and integrated REST APIs for seamless communication between frontend and backend systems
- Worked with SQL databases, data modeling, and ETL processes to manage and transform application data
- Applied OOP and data structures concepts to develop scalable, production-ready software solutions
- Collaborated with remote development teams using Git and Agile development practices

Software Development Intern — Friends Fabs

Feb 2023 – Jul 2023

- Assisted in developing and maintaining web applications using HTML, CSS, JavaScript, and Vue.js
- Supported backend development tasks using Node.js and SQL databases

Android Developer Intern — Verzeo Edutech

Jul 2022 – Aug 2022

- Developed and enhanced Android applications using Java and XML
- Integrated REST APIs and managed database interactions

PROJECTS

GetHelpApp

Real-time emergency alert platform connecting users directly with Fire, Health/Ambulance, and Police officials.

- Built a one-tap SOS system with live GPS location sharing and instant alert routing to on-duty officials using Firebase Firestore real-time sync
- Implemented role-based authentication (Firebase Auth) supporting distinct user and official experiences, including biometric/PIN shift toggling
- Designed a full alert state machine (pending → accepted → enroute → arrived → completed) with live responder tracking, Haversine-based ETA calculation, and arrival detection
- Integrated Google Maps SDK for real-time location tracking between users and responding officials
- Tech: React Native (Expo), Firebase (Auth + Firestore), Node.js, Google Maps SDK

FocusTicks

Behavioral productivity Android app for building and sustaining consistent daily habits.

- Developed a habit-tracking Android application with real-time data sync using Firebase
- Built user habit analytics features to help users monitor and improve consistency over time
- Designed an intuitive UI focused on daily engagement and long-term behavior change
- Tech: Android, Java, Firebase

CERTIFICATIONS

- AWS Cloud Practitioner (Foundational)
- Deloitte Data Analytics Job Simulation — Forage, March 2026 (Code: s2P8gRXtG4WQ7crF7)
- AI Interview Certification — Micro1, June 22nd, 2026
- Python & SQL for Data Science — SCALAR
- Java & JavaScript — Profenaa Tech
- Python, HTML, CSS, MySQL — Sololearn
